About

W3 Total Cache by W3 EDGE®

Viewing: General Settings

The plugin is currently **enabled**. If an option is disabled it means that either your current installation is not compatible or software installation is required.

Perform a , **at once** or or or .

General

Deselect this option to disable all caching functionality.

Preview Mode:

Enable

Use preview mode to test configuration scenarios prior to releasing them (deploy) on the actual site.

Save changes

Page Cache

Enable page caching to decrease the response time of your site.

Page Cache:

Enable

Caching pages will reduce the response time of your site and increase the scale of your web server.

Page Cache Method:

Disk (basic)

Save changes

Minify

Reduce load time by decreasing the size and number of **CSS** and **JS** files. Automatically remove unnecessary data from **CSS**, **JS**, feed, page and post **HTML**.

Minify:

Enable

*Minification can decrease file size of **HTML**, **CSS**, **JS** and feeds respectively by ~10% on average.*

Minify Cache Method:

Disk

Save changes

Database Cache

Enable database caching to reduce post, page and feed creation time.

Database Cache:

Enable

Caching database objects decreases the response time of your site. Best used if object caching is not possible.

Database Cache Method:

Disk

Save changes

Object Cache

Enable object caching to further reduce execution time for common operations.

Object Cache:

Enable

Object caching greatly increases performance for highly dynamic sites (that use the Object Cache [API](#)).

Object Cache Method:

Disk

Save changes

Content Delivery Network

Host static files with your content delivery network provider to reduce page load time.

CDN:

Enable

*Theme files, media library attachments, **CSS**, **JS** files etc will appear to load instantly for site visitors.*

CDN Type:

Self-hosted / File Transfer Protocol Upload

*Select the **CDN** type you wish to use.*

Save changes

Browser Cache

Reduce server load and decrease response time by using the cache available in site visitor's web browser.

Browser Cache:

Enable

*Enable **HTTP** compression and add headers to reduce server load and decrease file load time.*
